

You can access the tool by Tools > Simblend > Audio Editor

1. Drag and drop or browse from the project assets the audio you want to modify.
2. Click Generate Waveform to have a visual of the audio's Waveform
3. Adjust Trim and Fade values to your likings.
4. You can play and preview the audio before saving.
5. Click Trim, Fade And Save
6. Audio will be saved on the original audio's path and the name will have "_EDITED" at the end
